Allowable Subject Matter

1. Claims 5-7, 9-11, and 14-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to suggest the claimed system of manufacturing an air bag cover assembly, particularly of a housing having a respective infrared lamp for emitting infrared radiation and an infrared shield mounted thereon in combination with an apparatus for staking an infrared absorbing material.

Lanser is directed to a heat staking apparatus with an infrared heat source for bonding two plastic pieces together wherein one part has posts or studs that are inserted in similar sized holes in the other part and the stud is heated and then flattened (staked) to bond the parts together. An infrared heat lamp emits infrared radiation that is directed to the plastic posts either by a reflector or through fiber optic cables where the plastic posts absorb the infrared radiation and melt, at which point the staking tool or punch of the staking apparatus is driven by an air cylinder (piston) to flatten the melted plastic stud. The stud is allowed to cool and the parts are connected/bonded together (Column 1, lines 10-18, Column 1, line 45 to Column 2, line 11, and Column 2, lines 25-40). Lanser provides no motivation or suggestion for having an infrared shield mounted on the housing.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
